SUMMARY

IT professional with experience delivering and modernizing ICT systems within security-focused environments. Skilled in solution design, requirements engineering, UML/BPMN process modelling, application modernization, and cross-functional stakeholder coordination. Experienced bridging business and technical teams to support digital transformation initiatives, scalable application architectures, and operational systems. Strong background in Agile delivery, web technologies, and secure public-sector ICT ecosystems.

EXPERIENCE

• SOFTWARE ENGINEER (.NET / ANGULAR)

NATO COMMUNICATIONS AND INFORMATION AGENCY

JAN 2026 – CURRENT

Currently working at NATO's Joint Intelligence, Surveillance and Reconnaissance Centre, building and supporting IT systems for command, control, intelligence, and business operations.

Responsibilities:

- Reworking a classified webapp used internally by military users:
 - Design, implementation, and unit testing of features
 - UI/UX design
 - Containerization of services via Docker
 - Demo and feedback sessions with military end users
 - Technical documentation
- Providing application support for existing NATO systems:
 - Troubleshooting of programs, scripts, and integration services
 - User access management for operational systems

• FULL-STACK ENGINEER (SPRING BOOT / ANGULAR)

EGOV SELECT (CONSULTANT) • BELGIAN FEDERAL POLICE

DEC 2023 – DEC 2025

Worked as a consultant at the Belgian Federal Police as a full-stack engineer with a focus on Frontend, Angular and UX/UI.

Responsibilities:

- Led frontend architectural rework of a web application used by thousands of police investigators:
 - Identified structural inconsistencies across multiple component libraries
 - Proposed a consolidation strategy to a single component library (PrimeNG), reducing maintenance overhead
 - Led full frontend refactoring and UI/UX redesign, standardizing components and UI patterns
 - Mentored other developers throughout the initiative
- Design, full-stack development, and unit testing of application features
- Conducted accessibility audits using NVDA screen reader, emulating the experience of blind users

• JAVASCRIPT DEVELOPER

EFFICY

MAR 2023 – DEC 2023

Worked on the internal improvement team at Efficy, contributing to the rebuilding of their CRM product.

Responsibilities:

- Client and server-side development of application features, using Vue 3 (Composition API) and TypeScript
- SQL scripting to customize CRM functionalities requested by end users
- Unit testing and technical documentation

• WEB DEVELOPER CONSULTANT

EXPLEO

AUG 2022 - JAN 2023

Consultant position; used the period to deepen expertise in web development.

• WEB FUNCTIONAL ANALYST

SMALS

SEP 2019 - AUG 2022

Managed and delivered web-based projects for Belgian governmental institutions at an IT non-profit serving the Belgian public sector.

Responsibilities:

- Led delivery of the Belgian COVID-19 Passenger Locator Form:
 - Coordinated between health authorities, stakeholders, and development teams
 - Configured and maintained the form technically to reflect rapidly evolving regulatory requirements
- Managed the redesign of the ONEM and ONSS public-facing websites:
 - Defined project scope, budget, and planning; acted as interface between product owners and development/UX teams
 - Translated business requirements into user stories; validated deliveries across Agile sprints
 - Coordinated content migration, validated data consistency, and ensured publishing workflows remained operational post-deployment
 - Facilitated requirement clarification sessions, UAT coordination, and sprint reviews
 - Contributed to web development alongside analysis duties, bridging functional and technical delivery
- Requirements engineering and process modelling using UML and BPMN:
 - Produced use case, sequence, activity, and class diagrams to document system behaviour and application interactions
 - Modelled and documented business processes for workflow analysis, gap identification, and redesign initiatives
- Led stakeholder workshops and product demonstrations
- Project documentation including user stories (Jira/Confluence) and budget/effort estimations

• QA ANALYST (INTERNSHIP)

CANDRIAM

SEP 2017 - SEP 2019

Deployed at Candriam (asset management) as a junior QA analyst.

Responsibility:

- Defined a high-level IT testing strategy

EDUCATION

• IT BUSINESS ANALYSIS (MASTER)

ICHEC & ECAM

JAN 2017 - JAN 2019

Half-time work and study program about IT Business and Functional Analysis.

• MARKETING (BACHELOR)

EPHEC

SEP 2014 - SEP 2017

Transitioned from Sound Engineering & Music Production to Marketing.

SKILLS

• ARCHITECTURE & ANALYSIS

UML • BPMN • Requirements Engineering • Solution Design • Data Modelling

• PROJECT MANAGEMENT

Agile/Scrum • Jira • Confluence / Azure Devops • Sprint facilitation

• BACKEND

C# & .NET • Java & SpringBoot • TypeScript & Node.js • SQL Server & PostgreSQL • Elasticsearch

• FRONTEND & DESIGN

Angular / PrimeNG • Vue • HTML / CSS / Sass / Tailwind / Bootstrap • UX/UI Design • Wireframing / Figma • Gamification

• TOOLS & OTHERS

Git • Docker • Vite • Webpack • Excel • Photoshop • Illustrator • SEO • Google Analytics • Google Adwords • Google Tag Manager
